#### **EXECUTIVE SUMMARY**

Twice annually, the Board receives a status update on current capital projects and capital priorities in planning. This includes details on major capital building projects (>\$5 million) as well as a summary of routine capital renewal and renovation projects (<=\$5 million). Information on Infrastructure Impact Charge (IIC) projects and Information Technology (IT) projects is also included.

### **Major Building Projects**

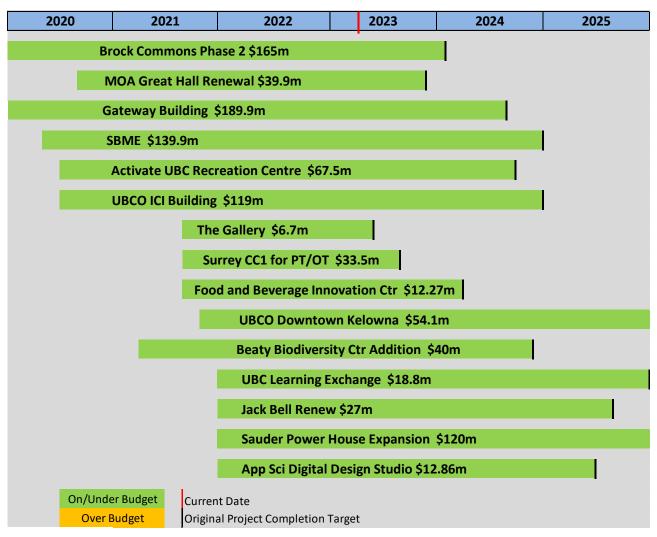

There are currently fourteen major building projects in construction or design, with a total approved value of \$1,046 million. Ten projects are on the Vancouver campus, including the School of Biomedical Engineering Building, Brock Commons Phase Two, the Gateway Health Building and the Activate UBC Recreation Centre North; two UBC Vancouver projects are off-campus – the Surrey project for Physical Therapy and Occupational Therapy Expansion, and the UBC Learning Exchange. Two projects are in the Okanagan – the Interdisciplinary Collaboration & Innovation Building and the UBC Downtown Kelowna project. The MacLeod Renew, Wesbrook Mall Redesign Phase 3, and Bioenergy Facility Expansion projects have all completed since the last Capital Projects Update.

A summary and detailed information on the capital project portfolio are provided in Appendices 1 and 2. Building projects completed since January 1, 2010 are included in Appendix 5 for reference.

The construction market continues to experience extreme COVID-related volatility, cost spikes, and delivery delays generated by supply chain disruptions and labour shortages, freight pricing, and high demand for materials and equipment. A concrete supply shortage in the Lower Mainland has created significant challenges for the Brock Commons Phase 2, Gateway Health, SBME and Recreation North projects. Despite being granted extended working hours, all of these projects have been faced with schedule slowdowns and increased costs, which project managers are endeavoring to cover through contingencies. The Gateway Health project has experienced the additional hit of a North American mass timber supply shortage and associated rising costs. The project received a single bid for the mass timber package, which the bidder then revised upwards significantly before signing a contract. Delivery of mechanical and audio-visual equipment on all projects continues to be especially challenging, with delivery often postponed even after tender award and receipt of delivery schedules.

These issues show no signs of abating. Market escalation and volatility and schedule delays are expected to continue for the foreseeable future. Project management teams at both UBC Properties Trust and Project Services (Infrastructure Development) continue to apply best practice risk mitigation strategies to the extent possible on projects currently in construction. Project budgets for projects in planning and design include healthy escalation contingencies, though there is wild industry speculation as to how high costs will rise.

The Retained Risk Fund (UBC Policy FM10 Retained Risk Policy) provides internal "self-insurance" for major capital projects to address cost overages resulting from unanticipated construction issues that cannot be managed with standard project contingencies. The current fee of 1% of the project budget (excluding taxes and financing charges) continues to be appropriate and sufficient to accomplish the objectives set out in the Policy. The Retained Risk Fund had a total balance of \$15.65 million on January 31, 2023. This includes \$13.54 million for the Vancouver campus and \$2.11 million for the Okanagan campus. These balances comply with the target level for the Retained Risk Fund of 1% of the value of active projects (assuming future Retained Risk Fee contributions for projects currently in design). Since the inception of the Retained Risk funds in 2009, a total of \$14.655 million has been paid out for projects on both campuses representing 0.52% of the total value of projects undertaken during that time.

## **Major IT Projects**

Major information technology projects currently in planning or implementation include the Integrated Renewal Program (IRP Student and IRP Release 1 Completion), and the Digital Payments Program. A listing of major IT projects is provided in Appendix 3.

#### **Routine Capital Projects**

Routine capital includes cyclical maintenance, rehabilitation, upgrade and renovation projects associated with campus buildings and infrastructure. These projects are generally valued at less than \$5 million and are funded from a variety of internal sources — Building Operations, Energy & Water Services, Faculties/Departments, Student Housing & Community Services, Athletics and Recreation, and Parking. The Ministry of Post-Secondary Education and Future Skills (PSFS) contributes funding for capital maintenance of core academic facilities.

In April 2022, PSFS confirmed 2022/23 funding of \$35.593 million for UBCV and \$872k for UBCO, with a notional commitment for similar funding in 2023/24 and 2024/25. PSFS specifies that these funds be directed toward reduction of deferred maintenance in core academic facilities and that the overall package of projects in each year must be cost-shared between PSFS and UBC on a 75%-25% basis. The Carbon Neutral Capital Program (CNCP) is separate from Routine Capital. PSFS has increased the 2022/23 CNCP funding to \$3.3255 million, with a notional commitment for similar funding in 2023/24 and 2024/25.

The UBC Facilities team (Infrastructure Development, Building Operations, and Energy & Water Services), in its Routine Capital Steering Committee, develops specific projects for the PSFS-funded routine capital program based on facility condition assessment and input from department administrators supporting building user priorities. To optimize resources, the team seeks partnership opportunities with Faculties and synergies with other infrastructure renewal and modernization requirements such as learning space upgrades, accessibility and seismic upgrades.

Most PSFS-funded projects are less than \$5.0 million and consist of core building system renewals such as roof and envelope repairs, elevator retrofits, electrical infrastructure projects, fire and life safety system retrofits, minor interior refit projects (such as flooring replacements and washroom refurbishments), and utilities infrastructure improvements. Planned projects are experiencing delays in materials and equipment delivery due to COVID-related supply chain issues; however, the size of the overall program allows the team to be nimble and to re-allocate resources between projects when necessary. PSFS is supportive of this strategy and works with UBC to approve revised project lists as required.

Example projects in this category for 2022-2023 include:

- Thea Koerner House and Addition roof renewal \$1.5 million
- Classroom ventilation upgrades in several older buildings \$1 million
- Chemistry D chiller and cooling tower \$900k
- Life Sciences Centre air compressor and vacuum pumps \$450k
- Bioenergy Research and Demonstration Facility substation \$450k

Some multi-year whole building renewal projects are also undertaken as part of the PSFS-funded program to address a full range of deferred maintenance items, seismic upgrade requirements, energy retrofit and facility modernization. These projects are larger in scope and are subject to the standard capital projects review process. Routine Capital whole building renewal projects greater than \$5 million being undertaken in 2022/23 were the completion of the MacLeod Building Renewal (Board 1, 2, and 3 approval September 2020), the Museum of Anthropology (MOA) Great Hall Renewal (Revised Board 3 approval December 2021), and the Renewal of the Jack Bell School for Social Work (Board 1 March 2022). These projects are included in the "Major Building Projects" summary, and are funded in the 75% PSFS, 25% UBC Routine Capital Program model. The MacLeod project is now complete, MOA Great Hall construction is proceeding well, the Jack Bell Building for the School of Social Work is in the design development phase, and preliminary planning for the next renewal is underway. UBC has received assurances from PSFS that they understand the multi-year commitment that UBC is making with these larger projects and do not intend to reduce their notional funding commitment for the duration of these projects.

Significant current routine capital projects outside of the PSFS-funded program include:

- 1) Laboratory of Archaeology (LOA) at Iona \$3.517 million
  - Renovation and conversion of the Iona Building underground vault to house a new LOA Community Research Centre which includes an Indigenous Knowledge and Archaeological Analysis wet lab, and a Community Research and Collaboration Lab. Funded by the Academic Capital Fund.
- 2) Robotic Milkers Dairy Education Centre \$3.1 million
  - Retrofit of existing facilities at the UBC Dairy Education and Research Centre in Agassiz to accommodate the implementation of six robotic milking machines. Funded by the Centre's operating budget, the Faculty of Land and Food Systems reserves and the Academic Capital Fund.
- 3) Clean Connected and Safe Transportation Testbed Hydrogen Refueling Station \$4.9 million
  - Development of a hydrogen refueling station on the west side of Thunderbird Parkade. Funded by CFI/BCKDF, BC Low Carbon Fuel Standard Credits, HTEC (industry partner), and NRCan. In construction.
- 4) Clean Connected and Safe Transportation Testbed Solar Array Project \$4.5 million
  - Integral to the operation of the Transportation Testbed is installation of a solar array on the roof of the Thunderbird Parkade to simulate renewable power generation in a realistic urban environment. Funded by CFI/BCKDF, BC Low Carbon Fuel Standard Credits, PacifiCan, and UBC Parking. In construction.

#### Infrastructure Impact Charge (IIC) Program

The IIC program includes utility, roads and public realm projects required to meet the needs of campus growth. Funding is provided through Infrastructure Impact Charges on neighbourhood and ancillary development projects. A separate information report on the IIC program is provided annually to the Board. Individual projects with budgets over \$5 million are brought forward for separate Board approval, and these projects are included in the "Major Building Projects" summary.

### **Capital Priorities in Planning**

Appendix 4 shows proposed major capital building projects currently in planning and design, most of which have not yet been brought forward for Board approval. The UBC Executive undertakes an annual prioritization of major capital projects with assistance from the Capital Planning Working Group and input from campus stakeholders. This process generates an updated Five-Year Capital Plan that is submitted each year to the Provincial government. The latest Five-Year Capital Plan (2023/24 – 2027/28) was approved by the Board of Governors in June 2022 and submitted to the Province in July. The projects in Appendix 4 reflect this Five-Year Capital Plan and other future capital priorities.

Proposed capital projects are evaluated and prioritized using an assessment model that considers how each project contributes to the University's strategic objectives and operational performance & risk mitigation objectives. Consistent with *Shaping UBC's Next* Century the 2018-28 strategic plan, the prioritization criteria that were used in the 2021 round of capital planning are shown below:

## 1) University Strategic Priorities

- President's Academic Excellence Initiative 10%
- People & Places 15%
- Research Excellence 30%
- Transformative Learning 30%
- Local & Global Engagement 15%

#### 2) Operational Performance and Risk Mitigation

- Health & Safety (e.g. seismic risk) 25%
- Performance & Reliability (e.g. deferred maintenance) 25%
- Legal / Regulatory / Reputation 25%
- Business Case 25%

Initial prioritization is "needs-based", therefore funding potential is not a criterion. Alignment with provincial priorities and funding realities are considered separately when decisions are made on projects to be included in the Five-Year Capital Plan or approved for internal funding allocation.

Input on the capital planning process and capital priorities is sought from the following groups:

- UBCV Committee of Deans
- Okanagan Leadership Council (AVPs and Deans)
- Indigenous Partners Musqueam, Okanagan Nation Alliance
- Property & Planning Advisory Committee
- UBCV Senate Academic Building Needs Committee
- UBCO Senate Academic Building & Resources Committee
- Vancouver Subcommittee of the Council of Senates Budget Committee
- Alma Mater Society / UBC Student's Union Okanagan
- Graduate Student Society
- Building Operations and Energy & Water Services / UBCO Campus Operations
- UBC Properties Trust (for information)

#### Seismic Resilience Plan

In September 2022, a Seismic Resilience Plan Update was submitted to the Board of Governors for information.

<sup>1 -</sup> Gross building area is the total floor area including the unrentable area in square feet.
2 - Current total deferred maintenance for Vancouver campus is \$1.29 billion per PSFS facility condition database for core academic buildings (not including student housing, athletics facilities and parkades).
3 - Less funding for large renewals, which is included in Major Capital Projects

<sup>4 -</sup> Cyclical maintenance, rehabilitation, upgrade and renovation projects >\$50,000 and <=\$5 million underway or completed in current fiscal year. Includes projects funded by PSFS, Building Operations, Energy & Water Services, Faculties/Departments, Student Housing & Community Services (SHCS), Athletics and Parking.

<sup>5 -</sup> IIC funded utility, roads and public realm projects underway or completed in current fiscal year. A separate report on the overall IIC Plan is also provided annually to the Board.

<sup>6 -</sup> Major IT projects are fully funded based on Board approved project budgets. Given the multi-year nature of the these projects, the projected final cost may vary based on available information at different points in time. If a project is completed under budget, all unused UBCV Central funding will be returned.
7 - IT projects, major (>\$5 million) and routine (>\$50,000 and <=\$5 million), currently in planning/design or completed in the fiscal year.
